

# The MICL Letter

May 2021

Summer Session

## ***Message from our President - Judy Moore***

### *Adventures In Learning*

As I finish my second year as president of MICL, I must, first and foremost, thank the executive board and tech team for moving us through the pandemic with expertise, determination, and grace. We faced steep challenges the last two years, and the MICL board has sought out the solutions to our down time and isolation. I so much appreciate their help and guidance.

We will install a new slate of board members at our May luncheon, and I'm sure we will be able to continue in 2022-2023 with the same level of quality programs MICL has always presented.

Please join us for summer session, enrolling now, and mark your calendars for our fall session beginning in August.

Thank you again for your support.

We will continue to "Ease on Down the Road"! (Credit to Charles Smalls- "The Wiz")

**INFECTIOUS DISEASES:** Infectious diseases touch the lives of everyone on the planet. On a worldwide scale, infectious diseases account for 26 percent of all deaths, second only to cardiovascular diseases. This course gives a comprehensive overview of diseases from the mundane to the fatal from renowned physician and award-winning professor Dr. Barry Fox. You will see how disease agents invade the body; follow germs through to different body systems and see what effects they have; and learn why we may be losing the battle against some germs.
