David Froba

**LANGUAGE FAMILIES OF THE WORLD:** First, below is a link that will get you to the trailer for the Language Families of the World class this summer. Just click on "trailer". This course is presented by Professor Mc Wortner, who has done three courses for us over the last couple of years on various aspects of linguistics: general linguistics, the alphabet, and now the language families of the world. He's the kind of teacher who can make a ham sandwich interesting (as well as delicious). He also has an excellent sense of humor.
