MEMBER TESTIMONIALS

Elaine Gorman

“MICL is the most thoughtful, smart, interested, and interesting group in Modesto!”

Paul Liu

“I joined MICL three months ago. I found the existing members to be friendly and welcoming. The classes cover a variety of topics from travel, history, science, current events, and so on. It is easy to find at least a few classes that will catch your interest.”

Lynn Hansen

“The MICL program at Modesto Junior College serves seniors in our commitment with so many opportunities to grow and continue their education. Courses vary but people attending the classes have a wide variety of topics to choose from including current events, travel experiences, cultural emersion, engineering, and architectural exposure, and more presented with passion, compassion and not lacking in intellectual content. MICL is one way to enlarge your circle of friends and is, in my life, indispensable for my continued learning.”

Bob Droual

“I retired three years ago and MICL made my transition from work to retirement seamless! I immediately made many new friends among people of diverse backgrounds: law (both lawyers and law enforcement), education, business, construction, engineering and blue collar. Everyone is welcoming and eager to learn something new. Join us!”

Sharon Froba

“MICL is a school for motivated seniors who choose to attend classes with content that appeals to them. There are no mid-terms or final exams. There is no homework. There is only the joy of learning something new with classmates who are equally interested.”

David Froba

“I joined MICL after I retired 20 years ago. My first interest was the class on current events. I soon begin to attend other classes too. I have also taught classes on numerous occasions. I must say that I am fortunate enough, at age 84, to still be pretty sharp. I attribute a lot of that to the ongoing mental and social stimulation that I have benefited from as a member of MICL.”

WEDNESDAY

Why Insects Matter 10:00 am - 12:00 pm

Coordinator: Bob Droual

Insects dominate the earth and after we are gone will continue to dominate! They appeared on earth about 480 million years ago and survived three mass extinctions. There are more than 1,000,000 species of insects, about 2,000 times the number of mammal species. They are incredibly diverse! Their evolutionary accomplishments include being able to migrate over many miles using the earth's magnetic field, jumping into the air 25 times their body length and running 125 times their body length in a second. They have evolved ways of avoiding conflict and loss of life by using ritualized behavior. Some insects have evolved agricultural methods long before humans: leaf-cutter ants harvest leaves to feed and grow fungus gardens, ants use antibiotics to control parasites, and some ants are even ranchers. In this course we will learn not only these and many other fascinating adaptations but begin to appreciate the beauty of insects as the ancient Egyptians did many years ago. Finally, we will learn that insects are not only beautiful, interesting, and accomplished but make for good eating! Yum!

In recent years MICL Members have learned a great deal about two Asian countries, Russia and China. This spring we will examine a country a little closer to home. Canada has ten provinces and three territories that are sub-national administrative divisions under the jurisdiction of the Canadian Constitution. In the 1867 Canadian Confederation, three provinces of British North America—New Brunswick, Nova Scotia, and the Province of Canada (which upon Confederation was divided into Ontario and Quebec)—united to form a federation, becoming a fully independent country over the next century.

We intend to explore both Province and Territory including their history, geology, major cities and politics.

Session A book: “Demon Copperhead” by Barbara Kingsolver

From the acclaimed author of *The Poisonwood Bible* and *The Bean Trees*, a brilliant novel that enthralls, compels, and captures the heart as it evokes a young hero’s unforgettable journey to maturity

Set in the mountains of southern Appalachia, *Demon Copperhead* is the story of a boy born to a teenaged single mother in a single-wide trailer, with no assets beyond his dead father’s good looks and copper-colored hair, a caustic wit, and a fierce talent for survival. Relayed in his own unsparing voice, Demon braves the modern perils of foster care, child labor, derelict schools, athletic success, addiction, disastrous loves, and crushing losses. Through all of it, he reckons with his own invisibility in a popular culture where even the superheroes have abandoned rural people in favor of cities.

Many generations ago, Charles Dickens wrote *David Copperfield* from his experience as a survivor of institutional poverty and its damage to children in his society. Those problems have yet to be solved in ours. Dickens is not a prerequisite for listeners/readers of this novel, but he provided its inspiration. In transposing a Victorian epic novel to the contemporary American South, Barbara Kingsolver enlists Dickens’ anger and compassion, and above all, his faith in the transformative powers of a good story. *Demon Copperhead* speaks for a new generation of lost boys, and all those born into beautiful, cursed places they can’t imagine leaving behind.
